

Design Patent No. 327572

# **POLYETHYLENE FEED HOPPER & FEED SYSTEM**

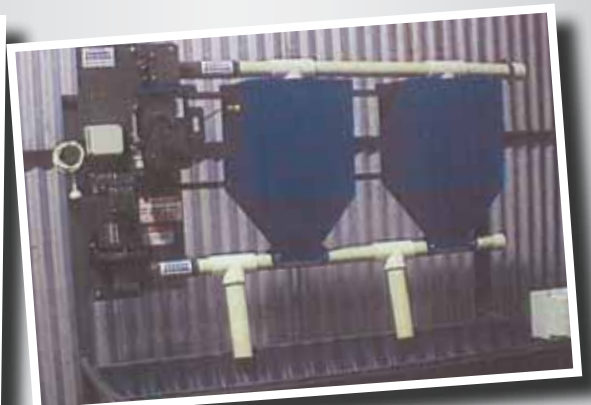

**This feeding system features our polyethylene feed hopper which has revolutionised the feeding system industry.**

**They are extremely hard wearing and more importantly, easy for the farmer to install.**

**Will not rust like steel hoppers and will not deteriorate easily in your dairy or piggery.**

**Feed drop is accurately controlled by motor driven auger and easy to adjust timer.**

**Can be used by any filling system in your dairy. Adaption to I.D feeding may be done at a later date if required.**
